Foreword

Projects for 2012

Hisatake Jimbo
President of JACET
(Waseda University)

Two years have passed since I assumed the presidency of JACET. I have completed my first term and am about to commence my second term.

Our objective this year is to bring the following projects to fruition.

1. JACET 50th Anniversary Publication Project

We completed publishing thirteen volumes of books in *A Series of Studies on English Education* in 2011.

We will also publish *JACET’s Fifty-Year*
2. Annual Convention

This year, the JACET 51st International Convention will be held from August 30th to September 2nd at Aichi Prefectural University in Nagoya. The theme of this convention will be “The Application of Contemporary Language Theories to Higher English Education: Focusing on the Importance of Content-based and Context-based Approaches.” The Convention will feature three keynote speakers: Dr. Ian Roberts (University of Cambridge, England), Dr. Ewa Dabrowska (Northumbria University, England), and Dr. David Singleton (Trinity College, Dublin, Ireland). The special invited speakers will be Dr. Yoshihiko Ikegami (Tokyo University, Professor Emeritus) and Dr. Steve Andrew (The University of Hong Kong). The closing symposium will address the convention theme and the panelists will be Dr. Roberts, Dr. Dabrowska, Dr. Ikegami and Dr. Masanori Toyota (Kansai University of Foreign Languages). The moderator for this session will be Dr. Yujitsu Ohmori (Aichi Prefectural University).

The Convention will feature a wide range of symposia and presentations. I hope many JACET and the affiliate members will attend this conference.

3. Seminars

The 39th JACET Summer Seminar will be held in Kusatsu, Gunma Prefecture, from August 18th to 21st, 2012. The main lecturers will be Dr. William Grabe and Dr. Fredricka Stoller who will address the theme: “Advanced EFL and ESP Reading.” The next spring seminar will be held in late March, 2013 at Waseda University. The tentative theme is “A New Framework of English Education from Elementary to Tertiary Level.”

4. Local Chapter Activities

Each JACET chapter will also be very active hosting its annual convention and publishing an annual journal and regular newsletters.

5. Collaboration with other academic associations

JACET has been pursuing collaborative relationships with other academic associations both domestically and internationally. We have invited many representatives of associate English teaching organizations abroad to our annual conventions in the past. I hope many will be able to attend our upcoming annual convention.

As a new initiative, we have begun to collaborate with the academic associations of other languages in Japan. The first attempt in this regard was the joint seminar with the German Language Association of Japan and the French Language Association of Japan on August 20, 2010 with the follow-up collaborative symposium held on March 10, 2012 at Waseda University. We will continue to pursue such collaborative relationship in the near future.

6. Reorganization

JACET has been incorporated as a public
interest association since August 15, 2008. The new law required us to choose between the status of General Public Association (Ippan Shadan Hojin) and that of Public Interest Association (Koeki Shadan Hojin). We have chosen the former and will complete the administrative reorganization by 2013.

I hope 2012 will be another fruitful year for our organization and all JACET members.

The purposes of JSLS are to stimulate research in the language sciences based on natural language data, in areas such as language acquisition, psycholinguistics, discourse analysis and sociolinguistics, and to support the development of the language sciences through exchange between researchers.

The Japanese Society for Language Sciences held its inaugural conference in 1999, and in 2011, its 13th conference. During this period, through trial and error, we have achieved a unique position in the area of language sciences in Japan and in the world.

The plenary speakers and the conference venues include:
1999 Brian MacWhinney (Carnegie Mellon University) Sophia University
2000 Michael Tomasello (Max Plank Institute for Evolutionary Anthropology) Coop-in, Kyoto
2001 William O'Grady (University of Hawaii at Manoa) Japan Women's University
2002 Andrew Radford (University of Essex) Japan Women's University
2003 Catherine Snow (Harvard University) Kobe University
2004 Bonnie Schwartz (University of Hawaii at Manoa) Aichi Shukutoku University
2005 Dan Slobin (University of California, Berkeley) Sophia University
2006 Fred Genesee (McGill University) International Christian University
2007 Andrea Moro (San Raffaele) Miyagi Gakuin University
2008 Bernard Comrie (Max Plank Institute for Evolutionary Anthropology) University of Shizuoka
2009 Roberta Golinkoff (University of Delaware) Tokyo Denki University
2010 Jack Bilmes (University of Hawai'i) University of Electro-Communications

A Contribution from JSLS (The Japanese Society for Language Sciences)

Yasuhiro Shirai
President of JSLS
University of Pittsburgh
The specializations of these plenary speakers include first language acquisition, second language acquisition, bilingualism, conversation analysis, linguistic typology, and psycholinguistics. Half of them are psychologists and half of them are linguists, and in terms of theoretical orientation, both generative and functional linguistics are represented. The papers presented at the past conferences include linguistics, psychology, conversational analysis, and neuroscience, among others, which represent diverse fields of inquiry. We believe this reflects our ‘interdisciplinary’ nature, which is one of the goals that we aim to achieve as an academic society. It goes without saying that complex phenomena involving language require investigations from multiple perspectives, and it is one of our missions to provide such a forum.

Another goal is to make our inquiry ‘international’. Most existing Japanese academic conferences in the area of language sciences appear to be functioning as a forum for domestic researchers to present their own work, and to learn from invited speakers from overseas. This is important, of course, but we JSLS treat our annual conference as an international forum to present and discuss research on language sciences, and strive for a society that ensures two-way exchange of ideas between Japanese researchers and international communities of scientists.

This goal has been achieved to some extent in the first 10 years. For example, in 2008, approximately 40% of abstracts were from overseas, both in terms of nationality and affiliation of the presenters, which included countries such as the USA, China, Taiwan, Korea, Germany, and Canada. In addition, the number of abstracts submitted for presentation in English was twice more than that for presentation in Japanese. To ensure the international nature of our conference, JSLS maintains an English-Japanese bilingual policy, and has made every effort to make sure its activities will be useful for members and participants who do not know Japanese. One such endeavor is the selected proceedings of our annual conference Studies in Language Sciences published in English (with Japanese abstracts) from Kurosio. In our review process, we invite top experts in the subfields of language sciences both from Japan and abroad to ensure high quality of the published papers. Starting in 2012, Studies in Language Sciences: the Journal of the Japanese Society for Language Sciences will be published from Kaitakusha, including papers written in Japanese to further uphold our bilingual policy. JSLS invites all kinds of scientific research in language-related phenomena. We
have seen some success in our first 10 years or so, and we further ask our members and future members to help us achieve further development of the society.

From April 2011, it became compulsory for students in grades five and six at all Japanese public elementary schools to participate in Foreign Language Activity (FLA) classes for 35 hours per year as part of the curriculum designated by the Ministry of Education, Culture, Sports, Science and Technology, Japan (MEXT). For these FLA classes, MEXT set the following overall objective on its website:

To form the foundation [emphasis added] of pupils’ communication abilities through foreign languages while developing the understanding of languages and cultures through various experiences, fostering a positive attitude toward communication, and familiarizing pupils with the sounds and basic expressions of foreign languages (MEXT, 2011).

There has been much discussion surrounding the interpretation of the word ‘foundation’, which has been translated from the Japanese word soji in this objective. Itagaki and Suzuki (2010, 2011) suggest that FLA classes should give students an abundance of input of foreign languages, in particular English, to develop their intuitive or implicit knowledge about words, phrases, and sentences. In this way, when they reach junior high school, students will be able to recall words and phrases that they heard during their FLA classes more easily. Leis (2012) adds that FLA classes need to increase the students’ interest and enjoyment of foreign languages, so that in junior high school English lessons, they will be highly motivated to learn the basic grammar and vocabulary needed for communication.

To answer the increasing demand for elementary school teachers who have an understanding of the objectives of FLA classes, confidence in their English proficiency, and the ability to teach foreign languages, Miyagi University of Education (MUE) developed a course for students wanting to become elementary school teachers and specialize in foreign language education. This paper will describe one of the courses, Eigo komyunikeshon kyouiku jissen taiken enshuu (Practical Experience of English Communication) (PEEC)
students in this course take.

In the school year starting in April 2011\(^1\), 18 first-year university students were registered in PEEC, along with one current elementary school teacher\(^2\), making a total of 19 students in the class. None of the students had had experience living abroad for more than three months, and their average score on the TOEIC test was 537 (SD=114.8), suggesting there was a great variety in the level of students’ English proficiency. Ninety-minute classes were conducted once a week on a Wednesday morning. The course ran for 15 weeks and assessment was conducted during class as well as by means of a written assignment.

The English version of *Teaching English to Children in Asia* (Paul, 2003) was designated as the textbook for this course. This was chosen, as the language is quite suited to the students’ English proficiency, there is a Japanese-translated version available for students who have trouble comprehending the content, it provides a basic introduction to the theory of teaching English as a foreign language (EFL), and has an abundance of practical activities for students to use in their model lessons, teaching practice, and in the actual classroom when they become teachers.

Each PEEC lesson followed a similar pattern. The first half of the class was used for model lessons conducted by the students. Here, students (two each week) led a 20-minute model lesson with the remaining students playing the role of grade five or grade six elementary school students. To improve their computer and presentation skills, students were encouraged to use either PowerPoint\(^\circledR\) or Keynote\(^\circledR\) in their lesson. Students decided the focus (e.g., colors, fruit, things you like), as well as the procedure for the model lesson. When they were finished, the remaining students gave comments and asked questions to evaluate the model lesson. The teacher evaluated the model lesson in the areas of: lesson plan, teaching methods, materials, attitude, and an overall mark. The model lesson accounted for 30 percent of the students’ overall mark for this course.

The second half of the PEEC lesson was used as a discussion about teaching in an EFL environment. The students were divided into two groups. Each group had a discussion leader who had been previously designated at the beginning of the course. After giving a short 10-minute presentation based on the content of the unit being studied that week, the students held a 20-minute discussion about issues related to that topic. Again, students were encouraged to use PowerPoint\(^\circledR\) or Keynote\(^\circledR\) in their presentation. The discussions were mainly held in English, but students did use some Japanese at times when they were unable to express their ideas or opinion clearly. The teacher evaluated the discussion leaders in the areas of: content, leadership, and an overall mark. The presentation and discussion leadership accounted for 25 percent of the overall mark for this course.
Furthermore, the teacher also evaluated every student on his or her participation in the discussions. This comprised 20 percent of their overall mark for PEEC. In the last ten minutes of the lesson, the instructor added some comments based on the content of the discussions, as well as a prepared handout summarizing the unit being studied that week.

Finally students were required to write four short English essays based on their knowledge and opinion regarding teaching EFL to young learners. This written assessment was submitted by e-mail and comprised 25 percent of their overall mark for PEEC. The topics for the essays were:

1. Why is it important for students of English to ‘link’ language? Give some examples. Write 150 words.
2. What do you see as the main role of the FLA teacher in elementary schools in Japan? Write 150 words.
3. Reflect on your model lesson. What process did you go through when planning the lesson? What affected the decisions you made for the class? After finishing, what parts of your lesson do you think were strong and weak? Write 150 words.
4. Think about FLA education in Japanese elementary schools today. What needs to be done to increase the number of elementary school children in Japan who speak English with confidence? Write 150 words.

In addition to these discussions and model lessons, students had the opportunity to experience FLA classes first hand. In the sixth week of the course, students visited Miyagi University of Education Affiliated Elementary School to observe an actual FLA lesson. This gave the students an opportunity to see an FLA class in action, increasing their motivation to teach and study further about pedagogy. Furthermore, students were given the chance to assist teachers in various elementary schools in the Sendai district through the Primary School English Education Center at MUE. This center, opened in February 2011, works with the goal of researching more effective teaching methods at the elementary school level, while conducting studies to achieve a deeper understanding of the theories surrounding teaching EFL to young learners.

English is the most obvious lingua franca used in the modern international community. In order to help prepare the youth of Japan to join this community, as well as lay the groundwork for EFL classes in junior high school, FLA was made part of the curriculum for grades five and six at Japanese public elementary schools from April 2011. FLA is still in the very early stages, and teachers who have little or no experience teaching EFL and have been assigned to coordinate these lessons still face many challenges. To help future teachers meet these challenges, MUE students studying to specialize in foreign
language education at elementary school take the PEEC course as part of their curriculum. This course enables students to increase their knowledge of theories related to EFL pedagogy, while also improving their English skills, teaching skills and computer skills through model lessons, presentations and discussions held in English. While some students did feel difficulty in the early stages of this course, all students commented that their confidence in using English had increased, and that the experience of conducting a model FLA lesson gave them an authentic image of what it is actually like to teach foreign languages to a group of students. To further develop the skills gained through this course, students are also required to take Eigo komyunikeshon kyozaikenkyu ensyu A in their second year of university, as well as Eigo komyunikeshon sougo ensyu and Eigo komyunikeshon ensyu B in their third year. It is hoped that this experience will improve the EFL teaching standards and English proficiency of future teachers, and in turn, creating a positive attitude towards English and other foreign languages among the elementary school students they teach.

Acknowledgements
The author would like to express his appreciation to Nobuya Itagaki, Kiyoshi Takahashi and Wataru Suzuki for their comments on an earlier version of this paper.

References

Notes.
1. Due to the 2011 Tohoku Earthquake and Tsunami on March 11, 2011, the 2011 school year at MUE actually began in May.
2. One elementary school teacher volunteered to join the class as part of his studies at MUE’s In-service Graduate School.
Introduction

This author’s main motivation for teaching English is the freedom greater English proficiency can afford students. Higher English proficiency gives students more choices for employment and more opportunities to find friends or love for example. With poor pronunciation skills, students are unable to effectively interact with other English speakers because the other English speaker cannot make sense of what they are saying. Poor pronunciation, therefore, has the potential to prevent a student from enjoying the freedoms of greater English proficiency even if their English language skills are excellent in other areas (Morley, 1991). Unfortunately, pronunciation is also neglected in most language classrooms (Wachowicz & Scott, 1999). To address this need for more pronunciation practice, the first fifteen minutes of two university English classes was dedicated to drilling minimal pairs and a number of extension activities using students’ cellphones. This paper is a short report on the experience, in particular, the successful incorporation of students’ cellphones for pronunciation practice.
Minimal Pairs Drills

The Minimal Pairs Drilling approach to teaching pronunciation started in the late 1950's and it is still very popular today (Wachowicz & Scott, 1999). A Minimal Pair is a pair of words, which differ in one sound only, for example, “berry” and “very”. This approach was chosen because it is recommended for enhancing students’ intelligibility and its effectiveness in highlighting weaknesses in pronunciation to students (Hansen 1995, as cited in Thomson & Gaddes, 2005). For the fifteen-class semester, a print containing a list, practicing two specific sounds of about 20 pairs sourced from John Higgins’ minimal pairs website (2011) was created. In addition to the minimal pairs list, tongue twisters, short sentences, or short paragraphs containing some words from the list were included in the print for each class.

Lesson Format

After presenting the print to students at the start of class, the author would introduce the two sounds to be focused on, explain how one physically makes the sounds, and then run a simple listen repeat exercise. In the next stage, students were asked to replay the listen repeat exercise in pairs, before taking turns to read short sentences, tongue twisters and short paragraphs. Cellphone activities were also incorporated during this stage of the exercise. After about 10 to 15 minutes of running the different pronunciation activities, the author would complete the practice with a short listening test. For the listening test, students were asked to mark each word the teacher read from the minimal pairs list. This test helped students evaluate whether they could distinguish between the two specific sounds effectively and it served to demonstrate the link between good pronunciation and listening skills.

Using cellphones in class

Students’ cellphones were incorporated to extend the pronunciation exercises and provide students with self-evaluative tools. Most university students love using cellphones and more importantly, they are very sophisticated mobile users (Dias, 2002). These conditions enabled very efficient transitions between lesson activities because students were confident using the technology. Furthermore, the cellphone activities appeared to be the most enjoyable part of the pronunciation activities for students.

The built-in voice recorders and video recorders found in all students’ cellphones were used in every class promote autonomous learning and encourage self-assessment (Thomson & Gaddes 2005). Students were asked to use their phone’s voice recorder to record themselves as they read the minimal pairs list, short sentences, tongue twisters and short paragraphs containing some of the minimal pairs. Students were also asked to record their own listening test based on the minimal pairs list, which would then be shared with another
classmate. All smart-phones have excellent video cameras and large viewing screens, which makes them an excellent self-assessment tool. With little over half of class members owning a smart-phone, pairs were created based on smart-phone ownership and each pair worked as either a “cameraperson” or an “announcer” to record one another. While recording, students focused in on one another’s mouths as they read through a text. Pairs then replayed their videos to critique the sounds they made and analyze the picture to see whether they moved their mouths correctly. To promote deeper self-assessment and autonomous learning, students also practiced using a smart-phone’s reversible camera, which enables a student to individually record their mouths.

The availability of a wireless network and high proportion of smart-phone ownership in each class allowed the author to experiment with a number of free applications or “apps”. Students were asked to download the following apps from their smart phone’s App store.

To develop students’ self-assessment skills the class experimented with Dragon Dictation. Students made a short recording of a word or sentence and Dragon Dictation would use the recording to create a written text. Students then checked to see if the written text correctly mirrored what the student recorded. In addition, the practice of reading short sentences allowed for other weaknesses in pronunciation outside of the targeted sounds to be revealed.

Taking advantage of similar voice recognition technology, the Google app and Google Translate apps were used to conduct a Google search and create a Japanese translation based on the student’s recording. In addition to evaluating whether a student’s pronunciation could be recognized by the app, students actively used these apps to find out about words they did not know from the minimal pairs list. It needs to be noted that both the Google and Dragon Dictation apps use voice recognition technology, which is still in the developmental stage; therefore, there are many occasions when the apps are unable to create the correct written text, even for native speakers. This issue, however, appeared to motivate students to speak more intelligibly.

Designed specifically for developing pronunciation skills Pronunciation Power was used throughout the semester to assist the author in instruction and as a reference for students. As seen below, this app clearly illustrates how one shapes or places their tongue and lips, which is often very difficult for the teacher to demonstrate to a large class. These illustrations support visual learners and they also make a very useful reference tool for individual review. In addition, this app provides a list of minimal pairs related to each specific sound. The only concerns with this app are that it is only available on the iPhone platform and the use of phonetic
symbols may confuse some students.

Post-class feedback concerning cellphone integration into the pronunciation activities was very positive. 62% of respondents rated these cellphone activities as “good” or “excellent” and 82% of respondents indicated that they want to use their cellphone for English study in the future. One concern is that only 38% of respondents actually incorporated some of the pronunciation study techniques for individual English study during the semester. One could conclude that with only 58% of class members actually owning a smart-phone, this percentage will increase as smart-phone ownership increases. The author also plans on incorporating more homework exercises, which encourage the different self-study techniques to address this issue in the upcoming semester.

**Conclusion**

While this short pronunciation exercise did not have students sounding like native speakers at the end of the fifteen-class semester, post-class feedback revealed that these activities were successful in raising awareness about pronunciation skills and equipping students with tools to autonomously evaluate and develop their pronunciation skills further. Greater availability of apps on the iPhone and Android platforms, increased smart-phone ownership and more attention to home study should enhance the efficacy of this approach.

Kansai Chapter Report
■ Past events
CHAPTER CONFERENCE
-The JACET Kansai Chapter 2011 40th Anniversary Conference
Date: November 27, 2011
Venue: Mukogawa Women’s University
Theme: New Horizons in English Language Education: Based on 40 years of JACET Kansai
Special Lecture (Professor Susan Hunston, University of Birmingham), Symposium
(past and current Kansai Chapter presidents), three Invited Workshops, two Invited Presentations, two Colloquia, seven Research Papers, eight Reports on Classroom Activities, and two Poster Presentations; 169 participants

LECTURE MEETINGS

-1st Chapter Lecture of the 2011 Academic Year
Date: June 18, 2011
Venue: Doshisha University, Imadegawa Campus
Chair: Yuko Shimizu (Ritsumeikan Univ.)
Invited Speakers:
(1) Osamu Takeuchi (Kansai Univ.): Brain-imaging and EFL Research: Some Findings in NIRS Studies on Reading
(2) Shin’ichiro Ishikawa (Kobe Univ.): L1/L2 Processing by Japanese Learners of English: An MRI-based Study
There were many questions and comments from the audience. (63 participants)

-2nd Chapter Lecture of the 2011 Academic Year
Date: October 1, 2011
Venue: Kobe International House (8F, Room 805)
Theme: Discussion on the Process Writing Approach
Presented by the Writing Research SIG
Chair: Junko Otoshi (Okayama Univ.)
Presenters: Keiko Hayashi (Hiroshima Jogakuen Univ.), Hiroyuki Yamanishi (Kansai Gaidai Univ.), Makoto Abe (Dokkyo Univ.)
The presenters introduced how they raised learner awareness through their writing instruction. An active discussion followed with questions and comments from the audience. (33 participants)

-Publications
The JACET Kansai Chapter Newsletter Numbers 56, 57, 58, and 59 were published in the 2011 calendar year. Current and back issues of the newsletter can be accessed at http://www.jacet-kansai.org/kako.html#kako

■ Forthcoming events
-3rd Chapter Lecture of the 2011 Academic Year
Date: March 3, 2012
Venue: Kwansei Gakuin University, Osaka Umeda Campus (http://www.kwansei.ac.jp/Contents?cnid=5743)
Presented by the Listening Research SIG
Chair: Yoko Hamamoto (Kansai Univ.)
Part 1: SIG members: The relationship between college students’ listening comprehension proficiency and their conscious use of specific listening strategies
Part 2: Takeshi Tarui (The Univ. of Electro-Communication): English listening and speaking rhythm of Japanese learners
Further information available at the JACET Kansai Chapter website (http://www.jacet-kansai.org/index.html)

■ Announcements
-Information on Chapter SIGs
The Kansai Chapter has eight active SIGs (special interest groups) that conduct research in a wide range of fields. For more information, please visit the following website:
http://www.jacet-kansai.org/kenkyukai.html

- JACET Kansai Journal
A special issue commemorating the JACET Kansai Chapter 40th anniversary, The JACET Kansai Journal No.14, will be published on March 31, 2012.

For further information on the Conference and all other Chapter activities, please visit the Kansai Chapter website at http://www.jacet-kansai.org/.

(Yuko Ikuma, Osaka Kyoiku University)

Chubu Chapter Report
The report in this issue covers the period from November 2011 to April 2012.

Executive Committee Meeting
1. The 6th Meeting: November 5 at Chukyo University
   Agenda: Report on the Central Board Meeting, Chapter president election, Chapter General Meeting, Winter Chapter Study Meeting, JACET Convention 2012
2. The 7th Meeting: December 10 at Chukyo University
   Agenda: Checking the documents to be distributed at the Chapter General Meeting, the budget, board members, and schedule for 2012, JACET Convention 2012
3. The 8th Meeting: January 7 at Chukyo University
   Agenda: Report on the Central Board Meeting, the budget and schedule for 2012, Spring Chapter Study Meeting, JACET Convention 2012
4. The 9th Meeting: February 18 at Chukyo University
   Agenda: Report on the Central Board Meeting, the budget and schedule for 2012, board members of JACET Convention 2012
5. The 10th Meeting: March 10 at Chukyo University
   Agenda: to be announced

Chapter General Meeting
Date: December 10, 2011, 14:00~14:30
Place: Chukyo University
Chapter budget, board members, and schedule for 2012 were approved.

Journal
JACET Chubu Journal, Vol. 9 was published and sent out to members on December 30, 2011. This issue includes 6 articles, 5 research notes, and 1 case study.

Newsletter
JACET-Chubu Newsletter 27 was sent out to the 350 members on February 1, 2012.

Winter Chapter Study Meeting, 2011
Date: December 10, 2011 at Chukyo University
Keynote speech: Prof. Ken Hisamura

(Tomohiko Oda, Sapporo Univ.)
The JACET newsletter is seeking contributions (about 700–1200 words) for upcoming publications. Papers should focus on EFL teaching issues, methods, practices or successful lesson plans in Japanese post-secondary educational institutions. References should be cited in APA format (the 6th edition). Please send your article as an email attachment to jacetnews@gmail.com. You will be informed as to the status of your submission within about two months from the time we receive it.

We are most grateful to Prof. Yasuhiro Shirai for his contribution to our newsletter. We also extend our sincere appreciation to the author of the special article: Prof. Adrian Leis.
